BUFFALO:
 OLIVER G. STEELE,

 1840.

PREFACE TO THE SEVENTH EDITION.

Entered according to Act of Congress, in the year 1840, by

OLIVER G. STEELE,

In the Clerk's Office of the Northern District of New York.

Steele's Press.

The following work has now reached the seventh edition, and has been constantly increasing in popular favor. It is now admitted to be an indispensable companion for all persons desirous of obtaining accurate information, and a correct idea of this greatest wonder of the world.

The work was originally prepared by Mr. H. A. Parsons, who was for a long time resident at the Falls, and familiar with the whole scenery at all seasons of the year, as well as with all the interesting localities in the vicinity; who omitted no means of obtaining accurate information in relation to the various facts stated, and his work was the first on that subject, of any extent or accuracy, ever published.

The present edition has been carefully revised, as well as improved in many particulars. New and correct maps of the Niagara River from Lake Erie to Lake Ontario, and of the Falls and immediate vicinity, have been added, and also, six new and accurate views of the Falls, from the most commanding positions. The work is now believed to be correct in every respect; and far superior to any other yet before the public.
